10 Steps to Solar Power

1. Site assessment for size and cost of system.
2. Analyze 1-year bill summary for needs.
3. Best laminates or glass PV panels are chosen.
4. SSP delivers a customized plan and contract.
5. Plans are submitted for permits & interconnection.
6. With the permits, equipment is ordered.
7. SSP submits rebate reservation forms.
8. Upon delivery of system, installation is scheduled.
9. With installation completed, final inspections.
10. Owner has an orientation and flips the switch.

SUACCI SOLAR POWER makes it easy...

Pay Yourself for Your Power

Energy independence begins with you, and Suacci Solar Power makes it simple. Generating your own electricity makes your home or business more valuable. Solar is a hedge against the coming rate hikes, and keeps you from the highest rate tiers. Lessening the burden on the grid reduces brownouts and blackouts, pollution, and power towers. Put your hard-won dollars into your own asset. You can pay yourself for your power!

Top-line Products, Bottom-line Results

Suacci Solar Power provides cutting-edge products. Knowledgeable consultants offer conservation help (half the cure!), our Building-Integrated Photovoltaics (BIPV), and other built-in green systems, will save money and save the planet. The best products for the best price will become your turnkey results. This benefits homeowners, businesses, designers, developers, & contractors. SSP is a reliable resource for state & municipal projects. SSP is ready to help.

Financing and Incentives

In consultation with your own financial advisor, we can guide you to the resources that best fit you financially.

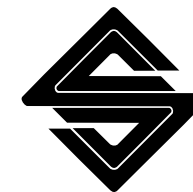

- All states differ, but in California, Early birds get the higher rebates.
- AB 811 has passed, allowing solar costs on property tax bills.
- Federal tax credit is 30% of costs.
- Self-financing options and loans.
- Commercial jobs can get Power Purchase Agreements (PPAs). Ask us how...

Our Mission: POP Power

Point-Of-Purchase Power, on every rooftop, is the fastest and least expensive way to have energy independence. SSP is an employee-owned firm of energy professionals, certified electricians, and factory-trained installers with decades of experience. SSP is dedicated to quality for value, customized systems, and customer service. Enjoy watching your meter run backwards, as you do your part in reversing global warming! The time is now.

Value-Added Services

SSP offers Return-on-Investment (ROI) studies, engineering, site plan reviews, permitting, energy efficiency comparisons, installation coordination, rebate and incentive administration, updates on legislation, and a reliable network of proven resources. It's time to go solar, and to make green by going green. We'll give you a free estimate, and show you how easy it is. We do the paperwork. Phone, or visit our website, for more information.
